

PROFESSIONAL SUMMARY

Passionate and detail-oriented Full-Stack Web Developer with 3+ years of experience specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). A graduate of Inceptor Institute of Technology, with a proven track record of designing, building, and deploying 10+ dynamic web applications. Specialized in combining modern, humanized user interfaces with secure, efficient backend logic, RESTful API integrations, and localized payment features like Safaricom M-Pesa STK.

WORK EXPERIENCE

Full-Stack Web Developer (Freelance Consultant)

2023 - Present

- Develop and deploy high-performance full-stack web applications for local and global clients.
- Build responsive, pixel-perfect frontend interfaces using React.js, TailwindCSS, and Bootstrap.
- Develop secure backend servers and APIs with Node.js/Express, managing databases with MongoDB.
- Integrate localized functionalities, including Lipa na M-Pesa STK push portals and Nairobi CBD delivery systems.

Software Developer (Academic & Portfolio Deployments)

2023 - 2025

- Collaborated on coursework and portfolio-grade project deployments focusing on version control and speed.
- Managed application builds and static assets deployments to Netlify, Vercel, and GitHub Pages.
